

IMPETUS

GROUPPROFILE

OVERVIEW

IMPETUS Group started its activity in the textile sector in 1973. Nowadays, with 4 companies and approximately 700 employees, the group reaches an annual production of 25,000,000 articles.

Presenting a completely vertical structure, the Group is specialized in the production of Cut & Sew and seamless articles, providing its customers an excellent service that covers the development, IDT, production and shipping.

The whole production is exported to markets such as Europe, Canada, United States of America, Australia, China, Mexico and Japan.

BUSINESS AREAS

The Group's commercial structure is divided into 3 business areas:

PRIVATE LABEL

OWNED & LICENCED BRANDS

HEALTH CARE

Being the strongest business area, the **PRIVATE LABEL** structure ensures the individual monitoring of each customer along all procedures.

Composed by a multidisciplinary team with high skills and knowledge of textile business, this Department is able to answer to all the customers requirements.

Currently the Group has partnerships with numerous renamed sports and underwear brands, offering them innovative solutions in accordance to their requirements.

Our own and licenced underwear brands, are in the top 10 of the main European companies of fashion segment.

The strong investment in ID&T together with the permanent research of new products and solutions resulted in the creation of **PROTECHDRY**, a patented medical device for light urinary incontinence.

INDUSTRIAL AREAS

SEAMLESS

In 1998, following the launching of seamless technology, the Group invested in the creation of an exclusive seamless production unit – CEF.

Our diversified number and type of machines allow us to respond quickly and efficiently to productions and developments requested by our customers.

Mainly devoted to the sports area, our seamless articles feature functional and innovative solutions suitable to the different sporting activities, benefiting from the use of technologies such as sublimation, bondings, etc.

CUT & SEW

The C&S structure presents the most advanced equipments, covering the areas of circular knitting, elastics weaving, centralized Lectra cutting system and sewing with high focus on flat-lock production.

DYEHOUSE

All C&S production and seamless is finished in our dyeing House – ACATEL, which is equipped with technology that allows a quick answer to sampling or production and at the same, presents various solutions of finishings and treatments according to customers requests.

SEAMLESS WINDOW

OUR ENGAGEMENTS

All group is certified **ISO9001**, **SA8000**, **Oekotex class 2** and **Bluesign**.

The strong investment and the dynamics of the IDT Department, allied to technical partnerships with **UNIVERSITIES** and **RESEARCH INSTITUTES** in the textile area, allow us to provide innovative solutions to our customers, placing us on the vanguard of technology.
